

Different Forms of Fillet Weld Symbol Representation according to European Standard

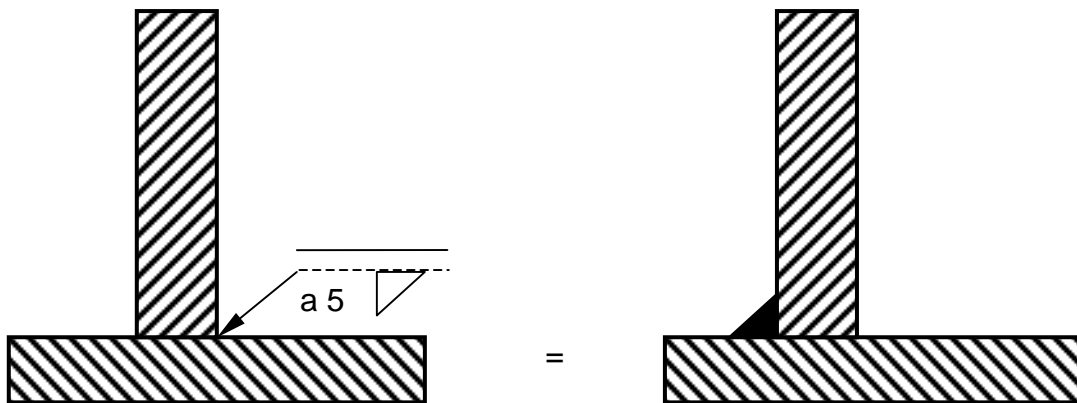

a. Single Side Fillet weld (Touching the „continuous line“ means: Weld has to be carried out on the “Arrow line” side).

b. Single Side Fillet weld (Touching the „dashed line“ means: Weld has to be carried out on the “opposite” side).

c. Single Side Fillet Weld (Different symbol representation but equivalent in practical welding execution, see also sketch "a").

d. Single Side Fillet Weld (Different symbol representation but equivalent in practical welding execution, see also sketch "b").
