CORPORATE DIRECTOR OF CERTIFICATION SERVICES

The American Welding Society seeks a corporate director for its growing Certification Services. The ideal candidate has a degree, preferably in engineering sciences, 5-7 years experience in running an operation along with P&L responsibility. The Corporate Director of the Certification Business Unit will ultimately answer to the AWS Board of Directors for program revenues, cost projections, and strategic goal accomplishment. Successful experience in new product development and rollout a plus. An understanding of welder procedures and performance qualification, the certification process, and the interface between AWS, its volunteer structure, and industry is important.

Interested parties should send a resume and salary range along with a cover letter outlining interest to:

American Welding Society

Advertise in Welding Journal's Safety Theme Issue This September.

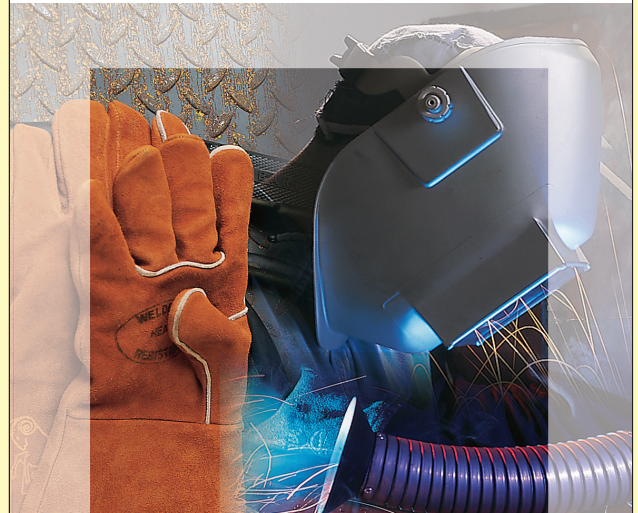

This is the issue that will focus on safety in the workplace---the latest products and the latest trends. Your ad will reach more than 49,000 AWS members who have a keen interest in always keeping their workplace safe and sound.

Harvey readership studies show that more 24,000 AWS members have purchased or

influenced the selection of safety related welding products within the last year. Be there with your strongest ad. Bonus distribution of this issue and your ad will also be made at the National Safety Council Exposition in New Orleans September 13-15, 2004.

September will also feature the popular practical welding advice section: The American Welder.

September issue closes for ads August 2, 2004. Call today! 1-800-443-9353 ext 243 or 220
