

AN INVITATION TO AUTHORS

Gentlemen:

The American Welding Society will hold its 67th Annual Convention and AWS Welding Show in Atlanta, Georgia, during April 13-18, 1986. One of the most important events of our 67th Annual Convention will be its Professional Program.

It is indeed a pleasure to invite you as Authors to be participants in the Professional Program of our 67th Annual Convention. On this occasion, the Society is offering an opportunity to Authors to bring the results of outstanding work on their part to the attention of our entire membership, the welding industry, and the nation's metalworking industries.

To this end, the Society's Technical Papers Committee will be happy to receive your application for participation in our 67th Annual Convention Professional Program; the Committee is inviting 500-word summaries for, basically, two categories of papers:

1. *Applied Technology*—unusual industrial or field applications of welding, new process or significant equipment developments, surfacing, unique welding case histories, education, safety and health, cost studies—also related topics such as nondestructive testing of weldments as well as maintenance and repair.
2. *Research Oriented*—results of significant laboratory research and/or development projects, welding metallurgy, weldability studies, weld cracking or fracture, new test methods, arc physics—also related topics such as fracture mechanics.

To apply for participation in our 67th Annual Convention Professional Program, please complete both sides of the Author Application Form on the facing page. Also, please prepare a 500 to 1,000 word summary of what you intend to say in your paper and mail with the completed form to AWS.

The Technical Papers Committee will screen all Author applications and summaries (also the manuscripts of completed papers if included), and we expect to notify Authors during late October or early November concerning acceptance. Completed Author Application Forms and accompanying 500-word summaries must be mailed by August 1, 1985, to ensure consideration for the 67th Annual Convention Professional Program.

Please note that, as it screens Author Applications and summaries, the Technical Papers Committee will be looking for: (1) the newness of information and need for the information in its field, (2) technical accuracy, (3) clarity of presentation, and (4) adaptability for oral presentation (a paper consisting basically of complicated tables would not be suitable for oral presentation).

Sincerely yours,

P. W. Ramsey
